

CRYPTOLOCKER :- THE ART OF DIGITAL EXTORTION

A sinking feelings comes when precisous computer data is lost. Business organizations may face closure if critical information is lost. A Whooping US 1.7 Trillion was lost in downtime & Data loss in US alone in 2014 .In todays digital edge when everything else is digital , cybercriminals are also using technology for extortion

Crypto Series of Malware is one of the example of this affecting millions of computers all over the world.

Some of the Interesting Facts of this Malware are as following -

- > Cryptolocker surfaced in early September 2013 . Intelligence agencies believe this malware has originated from Russia .
- > It enters in via email attachments or botnets & holds the user's data files hostage until that user pays to have those files released.

> It uses Strong RSA + AES encryption , while its early variants can be cracked , newer releases like CTB , Cryptowall v3.0 are difficult to crack

> It demands payment of US\$ 100 to US\$ 500 in Bitcoin underground currency

> A consortium of international law enforcement agencies & US Dept. of Justice disrupted Gameover Zeus Botnet which was used to distribute malware.

We at AK.Computers are helping our customers in retrieving there lost data. Pls.contact us for further information.
