

Data Recovery Process

While Some of the early variants of Crypto Series are cracked & data can be decrypted, developers have released more powerful versions. With the help of International experts we are performing extensive R & D to crack cryptolocker.

This Sophisticated Malware Deletes original file while creating encrypted file with same name. It even disables volume shadow Services.

Following File types are affected -

*.odt, *.ods, *.odp, *.odm, *.odc, *.odb, *.doc, *.docx, *.docm, *.wps, *.xls, *.xlsx, *.xlsm, *.xlsb, *.xlk, *.ppt, *.pptx, *.pptm, *.mdb, *.accdb, *.pst, *.dwg, *.dxf, *.dxg, *.wpd, *.rtf, *.wb2, *.mdf, *.dbf, *.psd, *.pdd, *.pdf, *.eps, *.ai, *.indd, *.cdr, *.jpg, *.jpe, *.jpg, *.dng, *.3fr, *.arw, *.srf, *.sr2, *.bay, *.crw, *.cr2, *.dcr, *.kdc, *.erf, *.mef, *.mrw, *.nef, *.nrw, *.orf, *.raf, *.raw, *.rwl, *.rw2, *.r3d, *.ptx, *.pef, *.srw, *.x3f, *.der, *.cer, *.crt, *.pem, *.pfx, *.p12, *.p7b, *.p7c.

Some of the Subjects of email sent by Malware are as following -

- 1)USPS - Your package is available for pickup (Parcel 173145820507)
- 2) Fwd: IMG01041_6706015_m.zip
- 3) Payment Overdue - Please respond

Currently only partial Data can be recovered from newly released computers . Using Proprietary forensic technology we can recover various file type like - doc / excel / PPT / PDF /JPG /PST etc.

Since file metadata is of no use (it points to encrypted files only) , we will have to recover data by ignoring file system components. This will result in loss of original file / folder structure and file names.

Some of the recovered files could be corrupt as well. (In complex recoveries like this it is perfectly normal)

Success of recovery varies from case to case as it depends upon various hard disk / data parameters like fragmentation ,cluster size , volume size , overwriting etc.

"In Truer Sense this cannot be called a Full Blown Data recovery , rather we are extracting whatever is leftover by malware"
