## Advantages of Disk Cloning

- 1) Original Media is write protected & not a single byte is altered
- 2) Multiple technicians can work on same case.
- 3) Disk drive being extremely sensitive and delicate device is well handled & preserved for later examination.
- 4) In case of failing disks , cloning helps to capture device most efficiently before it gets completely inaccessible.
- 5) Original media can be returned for warranty replacements .

## Features of Disk cloning –

- 1) Dedicated Hardware device no pc is required for both offsite /Onsite cloning
- 2) Massive 144 Petabyte disk size supported on SATA platform
- 3) Fastest possible cloning speed.
- 4) Larger size disk can be reduced to lower size for capacity match
- 5) 100 % Disk sectors including Hidden area ( HPA) cloned
